## Specially designed box according to the veterinarians' list of requirements

When the Swedish Board of Agriculture needed new service cars for the country's veterinarians Ydre Skåp was tasked with finding a solution. A reference group of veterinarians came up with a list of requirements and based upon these a prototype car was built. The project was evaluated for roughly 1 year and the first veterinary car was delivered in the spring.

**YDRE SKÅP** develops and manufacturers boxes for small and medium sized vehicles in addition to customising light weight vehicles. We utilise a high degree of creativity and a never-ending curiosity for coming up with new solutions, in combination with cost-effective production in order to offer our customers attractive transport solutions.
